

solace

A gentle companion for life's hardest logistics.

Plan ahead, navigate loss, and settle an estate — calmly, privately, one small step at a time. Here's how Solace works.

HOME

Everything at a glance

Your home is a calm dashboard, not a wall of to-dos. A progress ring shows how far along your plan is, and a single **Continue** card always points to your next step — so you never have to wonder where to start.

- ✦ Progress ring & "X of Y steps in place"
- ✦ One clear next action, with the reason it matters
- ✦ An **Ask Solace** bar — your AI companion, one tap away
- ✦ A snapshot grid that jumps you into any part of your plan

PLAN

All your planning, in one place

The Plan tab gathers everything that needs organizing, grouped so it never feels overwhelming. Work through it at your own pace — Solace tracks your progress as you go.

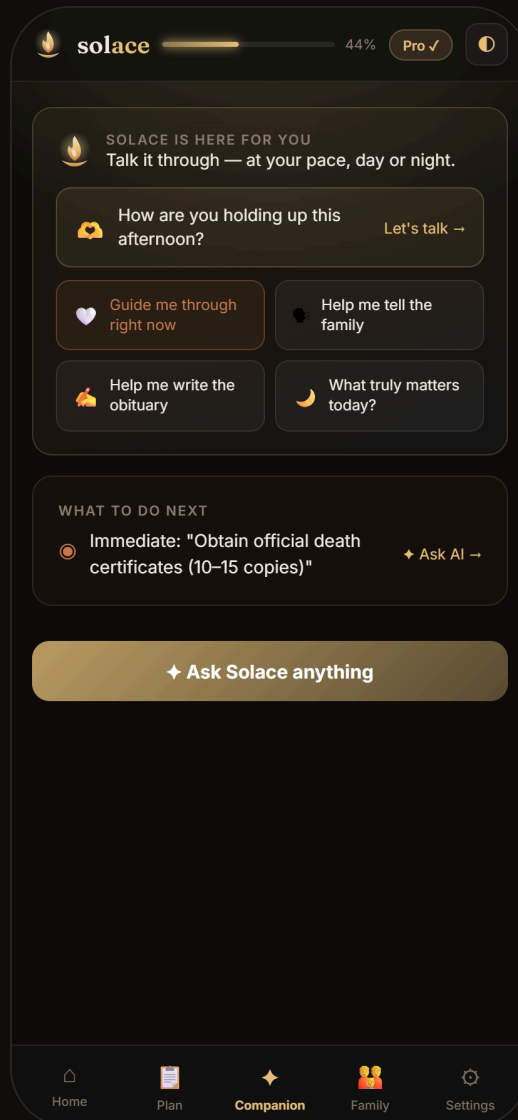

- ✦ A guided checklist across four phases: planning ahead, immediate, first week, first month
- ✦ Documents & records, with an end-to-end encrypted vault
- ✦ Estate & asset inventory, digital accounts
- ✦ Final wishes, letters to loved ones, cultural customs & crisis notes

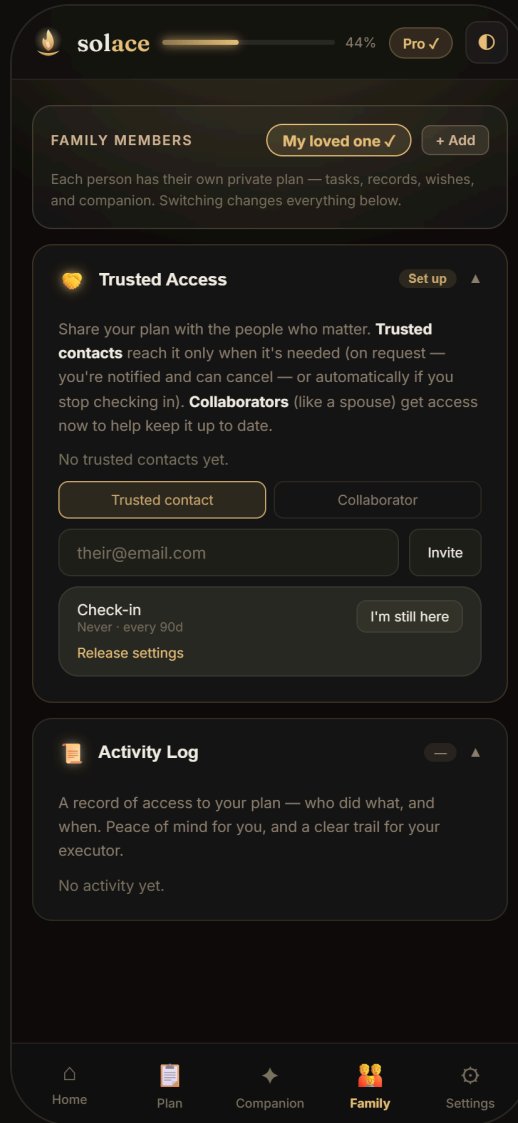

COMPANION

An AI companion, in your corner

Solace's companion meets you where you are. It opens with a gentle check-in and offers guided prompts for the moments that are hard to start — then drafts, organizes, and explains, at your pace.

- ✦ Warm, judgment-free check-ins
- ✦ Guided prompts: tell the family, write the obituary, get organized
- ✦ Understands the context of your plan and your loved one
- ✦ Powered by Claude — Opus on Pro, always private

FAMILY

Share with the people you trust

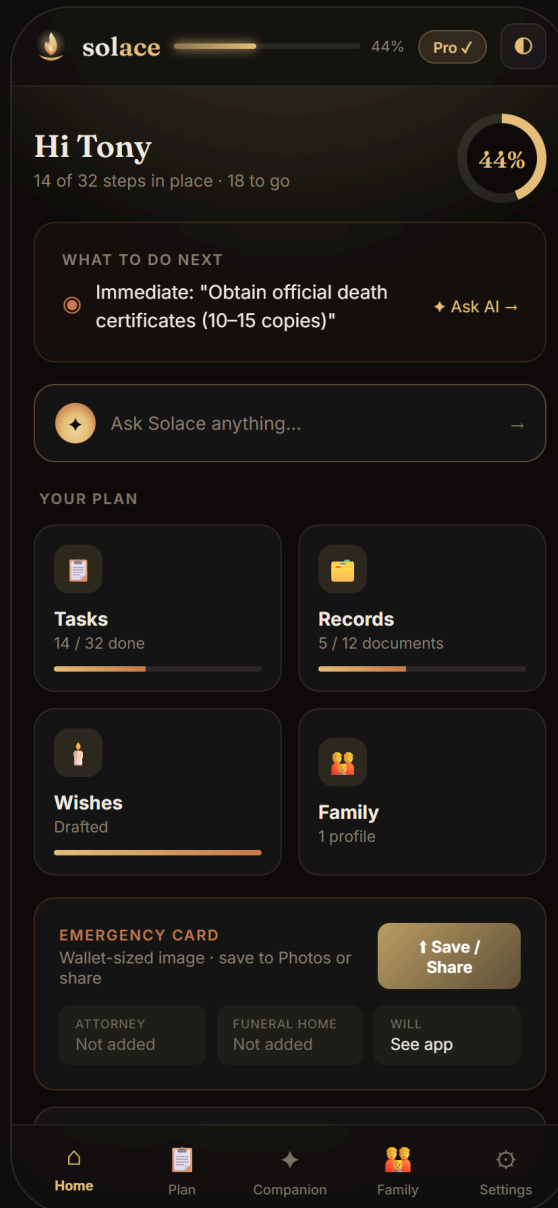

Plan for more than one person, and give trusted people access — on your terms, when it's needed. Solace keeps a clear record of who can see what.

- ✦ Switch between family-member profiles
- ✦ Invite deputies (read-only) or collaborators (read & write)
- ✦ A check-in so access stays in your hands
- ✦ An activity log of every access and change

MAKE IT YOURS

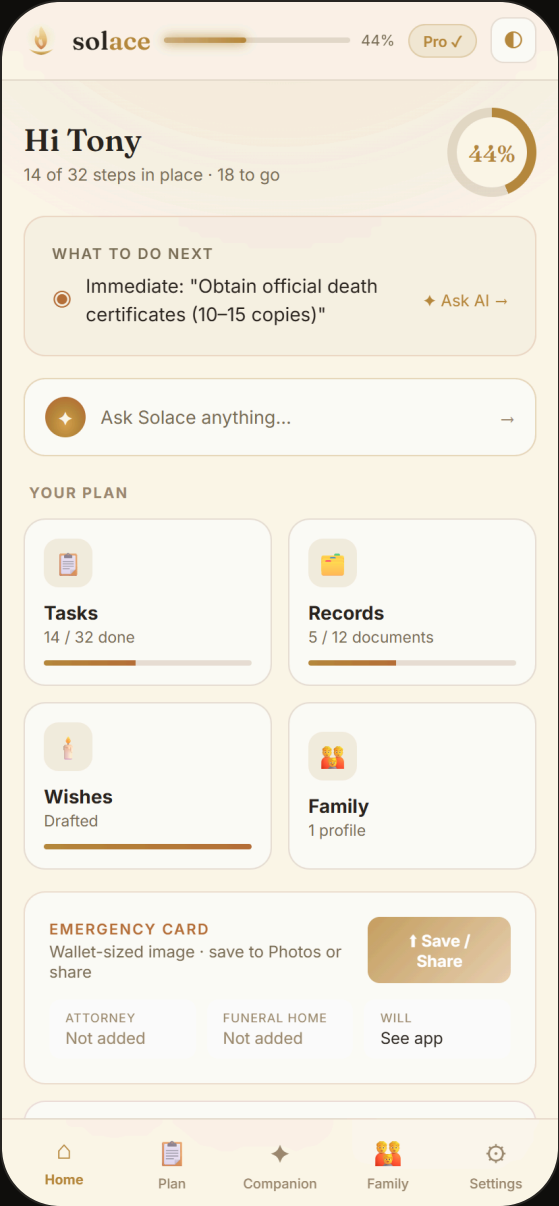

Six themes & a Calm mode

Tap  in the header (or open Settings) for Appearance — six palettes, four warm-dark and two light, plus a Calm mode that strips Home down to a flame, your progress, and one gentle step for the hardest days.

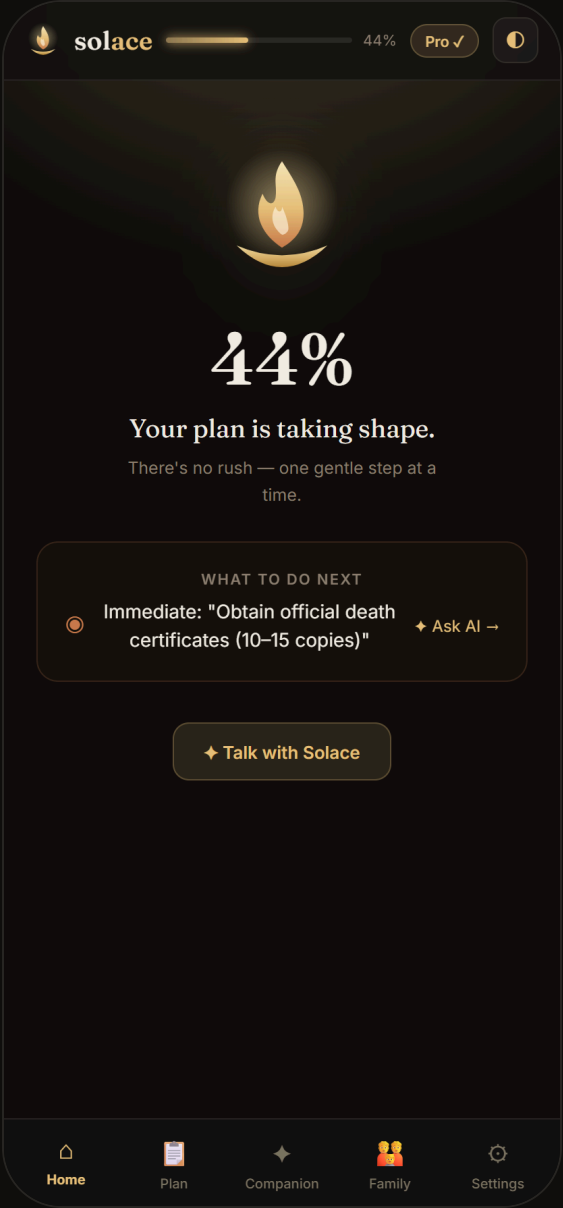

Candlelight

quiet & minimal

SETTINGS & PRIVACY

Yours, and private by design

Manage your account and subscription, export your whole plan as a PDF, and stay in control of your data. Solace works locally without an account; when you sign in, everything syncs end-to-end encrypted — only you hold the key.

- ✦ Appearance, account & subscription in one place
- ✦ Export your plan as a PDF anytime
- ✦ Refer a friend — give 14 days, earn a free month
- ✦ Delete your data whenever you choose

FAQ

Questions, answered

The things people ask most before they begin.

Q. Do I need an account?

No. Solace works locally on your device from the first tap. Sign in only when you want cloud sync across devices or to share with family.

Q. Is my information private?

Yes. When you sign in, your plan syncs **end-to-end encrypted** — only you hold the key. Sensitive documents live in an encrypted vault, and we never sell your data.

Q. What does it cost?

Solace is free to start, with a Pro trial included. Pro unlocks the full AI companion, the encrypted vault, estate inventory and more; a Family plan adds profiles and sharing.

Q. Is this legal or financial advice?

No. Solace helps you organize and find footing — it isn't a substitute for an attorney or financial advisor. For legal matters, please consult a qualified professional.

Q. Can I share my plan with family?

Yes. Invite trusted people as read-only deputies or full collaborators, switch between family-member profiles, and review an activity log of every access and change.

Q. What happens when it's needed?

A gentle check-in keeps access in your hands, and posthumous-release settings make sure your plan reaches the people you've trusted at the right time.

Peace of mind for the people you love.

Start planning in a few quiet minutes — no account required to begin.
